## Dangerous by Design 2011 [Overview](#) [Map of Fatalities](#) [State Statistics](#)

[All States](#) -

### Michigan

Between 2000 and 2009 **1,468** people were killed while walking in Michigan, which cost the state \$6.31 billion. Reducing pedestrian fatalities just 10% would have saved Michigan \$631.24 million over 10 years. Michigan's overall Pedestrian Danger Index (PDI) is 64.3, which ranks 19th out of 50 states. — [Download Michigan report/factsheet PDF](#)

## Preventable Pedestrian Deaths

The decades-long neglect of pedestrian safety in the design and use of American streets is exacting a heavy toll on our lives. From 2000 to 2009, 47,700 pedestrians were killed in the United States, the equivalent of a jumbo jet full of passengers crashing roughly every month.

Despite the magnitude of these avoidable tragedies, little public attention — and even less in public resources — has been committed to reducing pedestrian deaths and injuries in the United States.
